## Integrated Biometrics Achieves MOSIP® Compliance

**New Level of Secure Identity Management Transactions Available to IB Partners and End Users**

**SPARTANBURG, S.C., April 26, 2022** – [Integrated Biometrics](#) (IB), the world leader in mobile FBI-certified biometric fingerprint scanners, today announced the completion of MOSIP® self-compliance across its contact fingerprint devices.

MOSIP's cost-effective secure identity system enables governments to ensure secure biometric transactions through trusted environments using its Secure Biometric Interface (SBI) standards.

Integrated Biometrics multi-finger biometric sensors are among the world's most secure identity management solutions using its unique patented LES technology and strong encryption platform. The addition of MOSIP compliance provides another layer of security during the communication exchange.

“MOSIP is pleased to announce Integrated Biometrics as a MOSIP Partner in our self-compliance curriculum and the successful completion of the program. Events like this are an encouraging reminder of our dream of an ever-growing, global partner ecosystem.”

—Sanjith Sundaram, Head of Biometric Ecosystem, [MOSIP](#)

“Working with MOSIP to achieve self-compliance through its program was a straightforward, seamless process due to their excellent support. IB's technical acumen once again exhibits our leadership in the identity management market. IB is excited to add this additional offering to our global partners and end-users.”

—Fred Frye, Chief Scientist, [Integrated Biometrics](#)

### **About MOSIP**

*MOSIP (Modular Open-Source Identification Platform) was incubated at IIT-Bangalore as a global digital public good. The platform's modular architecture, easy configuration, and customization abilities, enables countries the flexibility to build their foundational digital ID systems in a cost-effective manner.*

*MOSIP enables countries to realize a digital identity led development and transformation agenda. Our vision is to help build a digital future, that is interoperable, inclusive, and trusted.*

*Funded by the Bill & Melinda Gates' Foundation, Tata Trust, Omidyar Networks, and NORAD, the platform is being adopted by the Philippines, Morocco, and Togo, and piloted in Sri Lanka, Ethiopia, and Guinea.*

### **About Integrated Biometrics**

*Integrated Biometrics (IB), a pioneer in biometric fingerprint technology, designs and manufactures advanced, high-resolution touchless and FBI-certified contact identity solutions for government, law enforcement, military, social services, and a wide range of commercial applications. IB's lightweight scanners, supported by our patented light-emitting sensor (LES) technology, outperform traditional fingerprint devices in size, power consumption, portability, and reliability. Global organizations rely on IB's products to enroll and verify identities quickly and accurately, even in remote locations under extreme conditions. Commercial enterprises, government and financial services organizations depend on IB to build innovative, secure applications to establish identity in accordance with national and international standards.*
