Arana Security Selects Integrated Biometrics' FIVE-0 Fingerprint Sensor for Biobox ID to Enable Fast, Mobile ID Enrollment

SPARTANBURG, S.C., March 7, 2022 – Integrated Biometrics (IB), the world leader in mobile FBI-certified biometric fingerprint scanners, announced that Arana Security has integrated IB's FIVE-0 sensor into Arana's Biobox ID, an all-in-one, portable solution for ID enrollment.

Five-0

The First FBI Certified FAP 50 Fingerprint Scanner [Visit the Five-0 product page](#) to learn more.

Biobox ID incorporates a biometric application with hardware components that are both waterproof and shockproof. The compact device delivers a world-class biometric solution between locations with ease, enabling authorities to capture and store data anywhere, under any condition, in under four minutes. With face, iris and fingerprint capabilities, Biobox ID permits multi-modal verification, while eliminating the possibility of identity fraud.

Embedded in Biobox ID, IB's FIVE-0 enables mobile FBI-certified, Appendix F, 10-finger enrollment and verification. It is impervious to latent prints and functions with both dry and dirty fingers without the need for hand lotion. Featuring Light Emitting Sensor (LES) film, it is unaffected by extreme temperatures or lighting conditions, making it adaptable in almost any environment.

According to Reem Aubdool, Director of Marketing for Arana, "FIVE-0 is a critical element of Biobox ID that allows for accurate identification enrollment in a wide range of programs including law enforcement, enhanced security checks, border control, and within banking & financial and education sectors."

Integrated Biometrics' Executive Vice President David Gerulski added, "We are thrilled to work with Arana and their integration of IB's FIVE-0 sensor into the Biobox ID device. The high reliability and speed which it provides in such a compact and durable design makes it ideal for in-the-field applications, wherever the location, whatever the circumstance."

About Arana Security

Arana Security specializes in biometric solutions, access control, smart card solutions and surveillance systems. Our goal is to meet the needs of clients and fulfill their requirements through combining know-how, expertise, and technology with excellent quality of support and services. Providing full end-to-end solutions to clients, Arana works with top manufacturers to deliver the most state-of-the-art technology and customized solutions that focus on quality, reliability, and cost. We work across different public and private sectors globally, including:

Governmental – Healthcare – Events – Financial – Education – Transport and Airports – Leisure and Commercial buildings. For more information, visit www.aranasecurity.com.

About Integrated Biometrics

Integrated Biometrics (IB), a pioneer in biometric fingerprint technology, designs and manufactures advanced, high-resolution touchless and FBI-certified contact identity solutions for government, law enforcement, military, social services, and a wide range of commercial applications. IB's lightweight scanners, supported by our patented light-emitting sensor (LES) technology, outperform traditional fingerprint devices in size, power consumption, portability, and reliability. Global organizations rely on IB's products to enroll and verify identities quickly and accurately, even in remote locations under extreme conditions. Commercial enterprises, government and financial services organizations depend on IB to build innovative, secure applications to establish identity in accordance with national and international standards.
